HILLYARD

The Cleaning Resource®

 **TRIDENT®**

Better Built. Better Equipment.

Comfort - Maneuverability - Productivity

Backpacks The Natural Way to Vacuum

The backpack is a more natural way for the human body to carry the weight of a vacuum. Centering the weight over the hips and easily maneuvering a 1 lb. wand versus pushing and pulling a heavy 15 lb. upright vac.

Greater Productivity

Backpacks outperform uprights according to ISSA - cleaning industry standards.

2,857 sq. ft.
per hour

14" Upright

7,407 sq. ft.
per hour

Backpack
14" Tool

Go Cordless!

Always Ready To Use

No self-discharge, it is always ready when you need it. No memory effect, you can recharge the battery whenever you want.

Fast Charge

You can use the BP6VLI several times in a single day.

High Discharge/Charge Cycle Lifespan

Handy Battery Charger

Lets you recharge anywhere, without wasting time.

Lower Total Cost of Ownership

Less Parts, Lower Repair Potential

Commercial vacuums take a lot of abuse. In a typical professional grade upright vacuum there are over 50 moving parts at risk. A backpack has a motor, a tank, a switch and a harness. Any question on what would cost less to maintain?

Dramatically Lower Operating Costs

According to industry standards, backpacks can cover over 2.5 times more square footage per hour than uprights. Time is money. The chart below illustrates the dramatic difference backpacks make. Less time also means less energy consumed.

	25k Sq. Ft.	50k Sq. Ft.	100k Sq. Ft.
Upright	\$23,626	\$47,252	\$94,505
Backpack	\$9,113	\$18,226	\$36,452
Difference	\$14,513	\$29,026	\$58,053

Based on ISSA productivity rates, \$15 per hour, 180 days/year.

* Per ISO 11201 Standard

Better Built. Better Equipment.

BP6V

BP6VLI

Specifications		BP6V	BP6V LI
Hillyard Item Number		HIL56016	HIL56017
Working Autonomy	Min.	Unlimited	Up to 60 min.
Accessory Kit	In	1.26	1.26
Tank Material	-	HDPE	HDPE
Voltage	V/Hz	120/60	36/-
