Delivering Powerful Insights Into Cleaning Programs

Developing an effective cleaning program is not a one size fits all proposition. There are a lot of questions. Do we have the right amount of people? Are they properly trained? Are we using the right processes, and products to maximize results? Are we achieving the best results for our cleaning budget? How much should we be spending on our program? Envirologix has the answers. It is a vendor-managed app built from decades of experience and a proprietary database containing information on over one billion square feet of cleaning programs. Envirologix combines experience, data, industry-accepted standards, and your facility information to build an optimized cleaning program that can maximize your budget and deliver the results your stakeholders demand.

Enabling Data-Driven Decision-Making

- Input building square footage, staff, and current equipment information.
- Set a desired baseline cleaning program.
- Analyze the baseline against current staff, equipment and process.
- Optimize your cleaning program by closing the labor gap with improved cleaning efficiency gained by Envirologix recommended new processes and systems.
- Take action on comprehensive reports that can provide insights into labor, facility information and cleaning program comparisons.
