

WE CLEAN GREEN

We're Doing Our Part by Establishing a Green Cleaning Program that Helps Protect Human Health and the Environment. Did You Know, Green Cleaning can:

- Help Us Stay Healthy
- Help Us Protect the Health of Our Custodians
- Help Us Increase the Lifespan of Our Building
- Help Us Preserve Our Environment

Did you know U.S. Buildings have a huge impact on the Environment?

- 36% of the Total Energy Used
- 70% of the Electricity Generated
- 30% of Waste Output
- 12% of Potable Water Consumption
- 36 Billion Trash Can Liners
- 5 Billion Pounds of Cleaning Chemicals and Coatings
- 4.5 Billion Pounds of Toilet Paper and Paper Hand Towles

For more information on green cleaning:

Here's what we're doing to help protect human health and the environment:

WE USE GREEN CLEANING PRODUCTS

We use environmentally-preferred cleaning products that have been certified by an independent, non-profit organization that strives to achieve a healthier and cleaner environment.

WE USE GREEN CLEANING EQUIPMENT

We have introduced green cleaning equipment like Green Label certified high efficiency vacuums which capture potentially harmful microscopic materials and operate at lower decibel levels.

WE USE GREEN CLEANING PROCESSES

We use green cleaning procedures that have a lower environmental impact. For example, by simply spraying cleaning solution onto a cleaning cloth, rather than on the surface being cleaned, less product is consumed and lower levels of VOC's are introduced into the environment.

WE USE GREEN CAN LINERS AND PAPER

We use trash can liners and paper products that contain recycled content whenever possible.
